* T e r m s & C o n d i t i o n s a p p l y .
A p p l i c a b l e f o r H I D p o l i c y h o l d e r o n l y .
We have a lot to be thankful for here at Honda Malaysia. Our new launches this year have proven to be very well-received by our customers, you. As we continue to grow our business and meet customers’ satisfaction, we strive towards introducing our latest technologies and products as well as extending our network to better cater to your needs in sales and service.

One of the latest in our lineup of next-generation technologies is the long-awaited launch of the All-New Accord. For the first time in Malaysia, car enthusiasts will experience Honda’s latest Earth Dreams Technology engine incorporated in the Accord 2.4L which offers increased fuel and performance efficiency. The luxury sedan also comes with many new smart features that you can read about inside this issue of With Dreams.

We have also been seeing a heightened market acceptance towards Honda Hybrids, more so after we announced another “first” in Malaysia - a price reduction of hybrid batteries and its extended warranty period of up to 8 years with unlimited mileage. This comes shortly after we successfully rolled out our own locally produced Jazz Hybrid from the Melaka plant late last year.

As part of our mission to bring hybrid technology closer to Malaysians, we are also running national on-ground activities like the Honda Hybrid Family Road Trip 2013. The campaign will be ongoing till December. Meanwhile, the Great Honda Hybrid Discovery is currently running online and offers opportunities for Malaysians to have an extended test-drive period with Honda Hybrid models. Do visit our Facebook page and website for more details on these activities.

You will notice that the pages at the back of With Dreams are now filled with an extended list of our dealerships nationwide. This follows our focus in establishing a strong dealership network to ensure we meet your satisfaction in sales and after sales service.

Thank you once again for your continuous support. We hope to bring you more good news in our upcoming issues.

Sincerely,

Ahmad Nasyami Mihat
Manager, Advertising and Promotions & Public Relations
Honda Motor (China) Investment Co., Ltd. unveiled the world premiere of some concept models from both Acura and Honda at the recent Auto Shanghai 2013. The Honda showcase was jointly hosted by Guangqi Honda Automobile Co., Ltd. and Dongfeng Honda Automobile Co., Ltd., which saw the debut of the Concept M, a new value MPV, and other new models from both companies.

There were plenty to feast the eyes on as the company revealed their direction to bring value-added innovations catered specifically for the Chinese market. “We believe that our role is to initiate actions to create new things and carve out a new and fun future together with our customers,” said Seiji Kuraishi, President of Honda Motor (China) Investment Co., Ltd.

The Concept M is undergoing mass-production development now and is set to be ready to launch by next year. Designed by the Automobile R&D Centre of Honda R&D Co., Ltd. in Japan, the MPV will bring new value to the fun of driving enhanced with a more comfortable and spacious cabin built from Honda’s packaging technologies.

Honda fuses good looks, practical qualities and innovative new values to continue driving growth in the dynamic China market.
The mass-production versions of the Concept C and Concept S were introduced as CRIDER and JADE respectively. The CRIDER’s design is based on the image of a dragon, with the middle-class sedan featuring an energetic exterior and a dynamic performance. Meanwhile, the versatile JADE reflects the stunning image of a jade stone with an elegant exterior that captures the stately qualities within. Both models are scheduled to go on sale this year in China.

Under the Acura showcase were some equally exciting concept models on display, which included their super sports model, the NSX Concept and the Acura Concept SUV-X, the first for Acura to debut a concept model outside of North America. While the mass production model of the Concept SUV-X will take place over the next three years, a Chinese version of the Acura RLX, introduced at the motor show, is currently being sold exclusively in China. The luxury flagship sedan is equipped with the new 3.5L direct-injection SOHC i-VTEC V6 engine and Precision All-Wheel Steer.

Other mass-production models showcased by Dongfeng Honda were the CR-V, Civic, Spior, Elysion, Insight and CIIMO. From Guangqi Honda, their displays included the Accord, Odyssey, City, Crosstour, Fit, CR-Z, Fit Hybrid and the minor model change of Li Nian S1, an original brand vehicle by the company.

“Honda will continue proposing automobiles that offer new value to our customers in China. At the same time, Honda, Guangqi Honda and Dongfeng Honda will work together closely to further localise the development, procurement and production of Honda products in China,” added Mr. Kuraishi.

“Honda will continue proposing automobiles that offer new value to our customers in China. At the same time, Honda, Guangqi Honda and Dongfeng Honda will work together closely to further localise the development, procurement and production of Honda products in China,” added Mr. Kuraishi.
Honda BUILDS FIRST WIND POWER STATION IN BRAZIL

The company will become the first automaker in Brazil to operate an entire production plant from renewable energy generated by the wind farm.

A wind farm is underway at the Honda Automóveis do Brasil Ltda. (HAB), the Honda automobile production and sales subsidiary in Brazil, as the company takes its environmental commitment further. HAB had earlier announced its plans to invest in wind power generation to produce renewable energy as a measure to minimise environmental footprint in its business activities.

Setting an exemplary leadership in environmental and energy technologies, HAB established Honda Energy do Brasil Ltda., a new subsidiary that will specialise in wind power generation and to manage all areas related to Honda’s wind power generation business in Brazil.

“Ever since Honda began local production in Brazil in 1976, Honda has been cooperating with the local community and striving to minimise the environmental footprint of our production activities. Wind power generation has proven to be very effective in reducing CO₂ emissions,” commented Carlos Eigi, President of Honda Energy do Brasil Ltda.

Through the generation of renewable energy, HAB aims to cover the entire electricity needs of the plant for automobile production, reducing its CO₂ emissions by staggering numbers. The wind farm is expected to start running in September 2014 and is currently under construction in the city of Xangri-lá in Rio Grande do Sul, the southernmost state in Brazil (approximately 1,000 km south of HAB’s automobile production plant in Sumaré, São Paulo).

Honda’s new racing hybrid is akin to a lab on wheels, with research and tests intensifying at every race.

Honda expanded its role in the Super GT Championship this year by supporting two private racing teams, TEAM MUGEN and AUTOBACS RACING TEAM AGURI, supplying them with Honda’s latest innovative racing hybrid system, the CR-Z GT. The CR-Z GT is made to stringent specifications of SUPER GT regulations under the GT300 class and fully maximises the potential of both the engine and regenerative energy from the electric motor.

While it retains the body of the mass production sports hybrid, the chassis is redesigned to fit a roll cage around the body with a monocoque shell as the base. Meanwhile its original drivetrain has been replaced with a twin turbocharged 2.8 litre V6 engine, which has a proven track record at winning the LMP2 class of the Le Mans 24-hour race in 2012.

Honda developed the MUGEN CR-Z GT as part of its continued research in advanced technologies that will lead the company to building more efficient, faster hybrid systems for the future.

**A STATE-OF-THE-ART HYBRID SYSTEM**

- **TOTAL LENGTH**: 4445mm
- **WIDTH**: 1940mm
- **OVERALL HEIGHT**: 1100mm or more (max height)
- **WHEEL BASE**: 2555mm
- **MINIMUM WEIGHT**: 1200kg or more
- **POWER PLANT**: 2.8 litre twin-turbo V6 + racing hybrid
- **ENGINE TYPE**: J35A
- **MAXIMUM OUTPUT**: 221kW (300ps)
- **MOTOR OUTPUT**: Max 50kW
- **FRAME**: Pipe frame structure
- **TYRE**: BRIDGESTONE made
- **TYRE SIZE**: 330/40/R18

**ACHIEVEMENTS AT SUPER GT**

- **1st appearance** at Round 4 of the 2012 SUPER GT Japan’s Sportsland SUGO course.
- **The 1st hybrid to secure a GT300 class pole position** at Round 5 of the 2012 SUPER GT at Suzuka Circuit.
- **2nd place podium finish** at Round 2 and 3 of 2013 SUPER GT at Fuji Speedway and Sepang Circuit respectively.

The MUGEN CR-Z GT is equipped with a twin turbocharged 2.8 litre V6 engine that enhances its race performance.
The All-New Accord that was recently launched in September this year sets a new standard for Honda sedans with its highly personalised features combined with elegant, high quality finishings and advanced functionalities that allow drivers to maximise the performance potential of the vehicle.

Having built the Accord through many generations since the first generation debuted in 1976, Honda has kept to the renowned traditional values of the car while upgrading its features to stay ahead of the segment in its class. Optimum visibility and a richly detailed, spacious cabin are still part of its heritage but the exceptional driving experience is dramatically improved as a result of Honda’s advanced technology, which plays a vital role in creating new value for customers.

The All-New Accord is offered with a choice of two powertrains: 2.0L and 2.4L, with the 2.4L engine featuring Honda’s latest Earth Dreams Technology known for its superior fuel economy, output and environmental friendliness. To boost the sophisticated drivability, drivers now have the option to turn on the ECON mode and monitor their driving behaviour for better fuel efficiency.

Stepping inside the car, futuristic details are seen in the roomy cabin that complements an elegant interior finishing. A slight adjustment to the body has resulted in an optimal driving experience, comfort and convenience for drivers. The smart layout also helped to achieve a more spacious interior that is topped by a winning combination of stylish luxuries such as a smart interface, Honda LaneWatch camera to reduce blind spots, a wider and clearer Multi-angle Rearview Camera, intuitive driving features, Active Noise Control (ANC) and Active Sound Control (ASC) for top-class cabin quietness.

All variants come with a large, easy-to-view 8-inch i-MID Touch Screen Audio System with the Accord Satellite-Linked Navigation System. For peace-of-mind driving, the Accord comes with all-round safety innovations like G-Force Control technology (G-CON), Anti-Lock Braking System (ABS), Vehicle Stability Assist (VSA), Motion Adaptive Electric Power Steering (MA-EPS) and Emergency Stop Signal. The Accord is also equipped with i-SRS front driver and passenger airbags, side airbags with Occupant Position Detection System (OPDS) and rear seat ISO Fix for child safety.

The All-New Accord comes in two new colours, Modern Steel and Champagne Frost, in addition to the classic variants in Crystal Black, Taffeta White and Alabaster Silver. To book a test drive, do visit any of the nearest Honda authorised showrooms nationwide or log on to www.honda.com.my for further details.
The ultimate luxury of the All-New Accord is in its details – clockwise from top:
1. The All-New Accord projects an elegant, timeless style both inside and out.
2. The LED Headlamps with Daytime Running Lights provide better visibility while saving 50% of its power.
3. Honda’s latest Earth Dreams Technology offers good performance and fuel efficiency.
4. The Rear Side Door Sunshade allows passengers to enjoy a quiet time in the cabin.
5. The Honda LaneWatch reduces blind spots for a safer lane change.
6. The 8-inch i-MID with Navi and Touch Screen Audio System add a touch of luxury to the smart interface.
TOP FIVE HYBRID MYTHS BUSTED

We debunked the popular myths about Hybrids that will absolutely change your mind about owning a Honda Hybrid.

**MYTH #1**
Hybrid cars are expensive and difficult to maintain.

Maintenance procedures are just the same like your regular petrol car and you will not even notice the price difference! Plus, hybrid component parts are covered under warranty for a long time, which brings us to bust the next myth!

**MYTH #2**
But replacing the hybrid batteries costs an arm and a leg!

That is so 90’s! Did you know that it has been over a decade since Honda introduced the Insight in 1999? We have built so many hybrids since, which greatly increased its affordability – so affordable that we can now introduce a new price for Hybrid batteries AND provide up to 8 years warranty with unlimited mileage (refer to the sidebar for the new prices).

**MYTH #3**
It is inconvenient to charge the battery.

How convenient will it be if you found out that the Honda Hybrid battery recharges itself whenever you brake while you are driving? Very simply, whenever you tap the breaks, electricity is sent to the batteries. That is how regenerative battery works, in a nutshell.
**MYTH #4**
Additional components to the powertrain make the car heavier.

A Honda Hybrid powertrain - the Integrated Motor Assist (IMA) - combines the engine, electric motor and Intelligent Power Unit (IPU). Each component is **super lightweight** yet with high-power and high efficiency. It is so **compact** it can be tucked under the car for a roomier interior.

**MYTH #5**
I have to re-learn how to drive a Hybrid.

Sure the technology is advanced but one of the best things about a Honda Hybrid is that it drives like any other petrol car – easy, with the same maneuverability. The only exception is that it squeezes every bit of energy without you doing anything different, so you can truly focus on **enjoying the ride**.

K.M. Lim Motor to Expand in Batu Pahat

"With an improved facility and soon-to-open Body and Paint Centre, the newly relocated 3S Centre is optimistic about the future."

K.M. Lim Motor has been receiving a larger slice of the auto market in Batu Pahat recently, after awareness grew of its new 3S Centre location. The company relocated from its three-shoplot facility in Taman Bukit Pasir to a standalone building in Jalan Parit Bilal last year but according to Managing Director, Albert Lim, business only started picking up recently.

"We suffered a 30% decrease in our service intake during our first three months of operations because we moved. Although we are just 5km away from our previous location, it is away from town. We are thankful now that both sales and service has increased tremendously and we are achieving around 5 to 10% more than our previous intake," he explains.

The new, stately 3S Centre is now home to a larger showroom that covers 90x90 sq ft, with up to ten cars on display.

"Customers' comfort is priority here. With our own land, we can design the 3S Centre with customer's comfort in mind. Not only is the indoor environment more airy and spacious, the car park in front of the showroom and service reception area is also sheltered for the convenience of customers," he adds.

Operating in a small town, the dealership relies on word of mouth to be the key in driving sales.

The bigger and greener facility stands on its own plot of land which houses a showroom, waiting lounge, children's area, 18 service bays and a car wash and polishing area. The new location can now accommodate up to 120 cars in a spacious parking ground.

"Customers' comfort is priority here. With our own land, we can design the 3S Centre with customer’s comfort in mind. Not only is the indoor environment more airy and spacious, the car park in front of the showroom and service reception area is also sheltered for the convenience of customers," he adds.

The management of K.M. Lim from left to right: Christopher Lim, Teo Uan Yan, Lee Pey Chyn, Tan Pek Sim and Managing Director, Albert Lim.
K.M. Lim aims to provide a complete range of services to be a one-stop destination for Honda customers.

K.M. Lim Motor caters to customers near and far, including the small towns surrounding Batu Pahat, from Semerah to Rengit, and Yong Peng to Air Hitam. Word of mouth, they say, is the key to selling anything in Batu Pahat.

“It is a small town. Most of our customers have become friends and loyal Honda supporters. Our history goes back to 1985 when our late founder, Lim Kim Ming, started Lim Motor as a used car dealer before he set up K.M. Lim Motor to become a Honda dealer in the Nineties,” he explains.

“We attribute the success of our dealership to his unwavering dedication, having started as a Manager selling Honda’s in the Seventies under a subsidiary of Kah Motor. It is therefore ingrained in all the staff here at K.M. Lim Motor that we should keep a good rapport with our customers to maintain our reputation.”

“Fast, serious and no excuses, that is our motto. We hope our staff will continue to be happy working here and customers can enjoy the best of our services,” he concludes.

With up to 18 service bays, the new 3S centre can now achieve an intake of up to 1000 cars per month.

With the relocation, the 3S centre now also offers air-condition servicing, and tyre balancing and alignment.

C’s and A P: Honda’s APPROACH TO CUSTOMER SATISFACTION

We adhere to stringent quality control at all Honda Authorised Dealers so that our customers can benefit from excellent after sales service.

At Honda, we strive to achieve first rate service operations by stepping up our efforts to enhance customer satisfaction every step of the way. Aside from customer-friendly amenities that are provided with customer’s comfort in mind, all our dealers are fully equipped with the right equipment and qualified professionals to diagnose and rectify all things related to Honda vehicles. This is why you should insist on bringing back your Honda to an authorised dealer at all times.

1 COMFORT & CONVENIENCE
Customer Friendly Facilities
For convenience, you can schedule a service appointment in advance. The customer lounges at our dealers are equipped with complimentary Wi-Fi, reading materials and television for a touch of hospitality. You can also sit back and enjoy a hot drink or light snacks while you wait.
COMPETENCE
Top Quality Repairs With Qualified Professionals
Our dedicated team of Service Advisors and Technicians are highly trained to meet Honda’s standards of expertise. They are equipped with the knowledge on all things Honda using specialised tools required to rectify any problems with your Honda.

PEACE OF MIND
Genuine Honda Parts Guaranteed
You can be assured that only genuine parts will be used to achieve the optimum performance and quality maintenance of your Honda.
BEYOND CAR INSURANCE, DESIGNED FOR A HONDA

The Honda Insurance Package (HIP) is tailored to provide you with a comprehensive range of coverage in any eventuality.

At Honda, we believe that our customers deserve more than just basic car insurance. That is why when we created the HIP, we considered the details of every eventuality and sought after the country’s top insurers to provide extra coverage that assures you of its reliability. On top of that, HIP also includes a wide range of privileges so that nothing comes between you and the joy of owning a Honda.

Value Added Services
- Special Perils Coverage
- Car Rental Assistance
- Arrangement for Hotel Accommodation
- Emergency Message Transmissions
- Optional Personal Assistance (PA) Coverage to Safeguard You and Your Passengers
- Windscreen Coverage Option

Speedy & Convenient
- Speedy Approvals for Claims Below RM10,000
- 24-Hour HIP Call Centre and Roadside Assistance
- Free Towing up to RM400.00
- Arrangement of Flights
- Medical Referral and Appointment Arrangement

Superior Coverage
- Covers 100% of total sum insured for first 5 years for total loss or theft
- No premium loading
- No excess fee except for compulsory excesses
- No betterment
- Guaranteed genuine parts usage and quality repairs at authorised dealers and panel workshops
- All repairs come with a 6 month/10,000 km warranty

Road Assist

*Terms & Conditions apply. Applicable for HIP policy holder only.

For full HIP information, please download the brochure from http://www.honda.com.my/owner/hip_introduction/
Honda and You

THE HONDA HYBRID FAMILY ROAD TRIP 2013 STARTS NOW!

Honda Malaysia organised an eco carnival for the very first time to share the excitement and fun of driving a hybrid along with creating awareness for a more eco-conscious lifestyle.

The Honda Hybrid Family kicked off a nationwide road trip last 22nd June in Queensbay Mall, Penang, where the public was given the opportunity to experience the benefits of driving the Insight, Jazz Hybrid, CR-Z and Civic Hybrid while participating in some fun entertainment on all things hybrid and eco.

Earlier in June, the company had taken a huge step to reduce the price of hybrid batteries replacement by up to 52% and announced its extended warranty period of up to 8 years with unlimited mileage, the longest in Malaysian automotive industry. The Honda Hybrid Family Road Trip is part of Honda Malaysia’s continuous commitment in hybrid education and eco awareness while making its range of hybrid vehicles more widely available to the masses.

The event presented an ideal opportunity for many car buyers to test drive a Honda Hybrid model while having an enjoyable outing with friends and family. In addition, Honda Hybrid motoring club members were also showcased at the event to share their passions of owning a hybrid.

The event featured the Hybrid Treasure Hunt, Tandem Bike engagement activities, Formula-E game and interactive videos. Plenty of other fun activities like the eco bazaar, blood and sugar tests and a kids’ corner with face painting and sand art, among others, were also taking place under the carnival tents while local performers like Altimet, Tengku Adil, Nick Cheung and Danny Wen made appearances to entertain the crowd.

The Honda Hybrid Family Road Trip 2013 will continue till October 2013 at the locations listed in the table. Come and experience the fun driving Honda Hybrids, take home a Honda merchandise or win many of the prizes from the activities held during the event.

Located at the Northeastern part of Peninsular Malaysia, sharing a border with Thailand, Kelantan’s cultural heritage is well-preserved in its variety of traditional games and art forms.

**Things to Do**

**Kite Flying**
Kite flying is a perfect pastime here where the fields are vast and shores are endless. Known for their kite-making skills, most notably the Moon Kite or “Wau Bulan”, the men in Kelantan traditionally flies the kites after the harvest season. Look out for the various types of colourful and intricately designed kites like Wau Kucing, Wau Merak, Wau Jala Budi and Wau Bulan along the way to Pantai Cahaya Bulan.

**Wayang Kulit**
Age-old art forms that hint at Kelantan’s culturally rich heritage can be seen in the traditional puppet show known as Wayang Kulit, where ornate puppets are brought to light by a master storyteller using light and shadow play. You can find the puppet makers in Kampung Kemasin, Kampung Parit Pasir and Kampung Kebakat.

**Places of Interest**

**Gelanggang Seni**
Step back in time at this cultural centre where you can watch a variety of traditional performances such as giant kite flying, Wayang Kulit, top spinning, Malay art forms like silat and other musical performers. Check with your hotel or the tourist information centre for a timetable of events happening each day.

**The Three Markets of Kelantan**
There are three main markets that have become the “must-visit” stops for any tourists to the city. The Pasar Besar Siti Khadijah (Central Market), Bazaar Buluh Kubu and Wakaf Che Yeh Night Market are shopping havens filled with a variety of local handicraft, antiques, batik, local silverware, clothing and household items. If shopping is not your thing, there are plenty of local delicacies offered by the stalls to feast your heart out.
